

Power Engineer

Location: Nipigon Power Plant
One (1) Permanent, Full-Time Position

Atlantic Power is looking for a motivated and safety oriented Power Engineer to work at our Nipigon Power Plant, located in Nipigon, Ontario.

As the successful candidate, your qualifications include a Standardized or Ontario Second Class Operating Engineer's certificate as a minimum.

Previous experience in environmental, health and safety is considered an asset, as is additional trade certification. The candidate will bring demonstrated analytical and troubleshooting skills and proficiency with computers and technical software to the position. Your strong communication abilities, focus on safety, and interest in continuous improvement will be critical to your success in this role.

Interested individuals can submit their resume to fwick@atlanticpower.com or contact Frank Wick at (807) 885-5571. Vacancy will be filled as soon as possible.
